## 4K Media Playback

Supports up to 4K video playback with image slideshows and scrolling text. Simple drag-and-drop interface allows user-definable screen layouts with overlapping zones.

Intuitive scheduling makes it simple to create campaigns and customize them to meet any signage requirements.

## Cloud-based Software Features

The Mvix platform is designed for flexible signage installations. **Simply purchase a BrightSign player and an Mvix software license.**

Signage software is scalable and comes with dozens of content widgets.

The Mvix and BrightSign are ideally suited for office spaces, schools, healthcare facilities, and more!

## How does it work?

1. Purchase an Mvix software license for your BrightSign Series 3 or 4 media players
2. Contact the Mvix Support Center to download the latest version of the screen firmware
3. Install the device firmware on your device.
4. Once the firmware is installed, follow on screen instructions to activate device.
